

# Maxi-Jet® PH

MULTI-USE PUMP AND POWER HEAD

Maxi-Jet®PH can be mounted on an undergravel lift tube or attached to the aquarium wall.

Maxi-Jet®PH is one of the few pumps on the market that can be used outside the aquarium. Use Maxi-Jet®PH to create a gentle waterfall effect.

## Benefits & Features

| Model  | V/Hz   | Power Consumption (in watts) | Maximum Flow |     | Maximum Pumping Ht. |        | Dimensions Inches |   |     |
|--------|--------|------------------------------|--------------|-----|---------------------|--------|-------------------|---|-----|
|        |        |                              | l/h          | g/h | meters              | inches | H                 | W | L   |
| MP400  | 120/60 | 5                            | 400          | 106 | .73                 | 29     | 3.25              | 2 | 2.5 |
| MP600  | 120/60 | 7.5                          | 600          | 160 | 1.35                | 53     | 3.25              | 2 | 2.5 |
| MP900  | 120/60 | 8.5                          | 870          | 230 | 1.17                | 46     | 3.25              | 2 | 2.5 |
| MP1200 | 120/60 | 20                           | 1100         | 295 | 1.74                | 69     | 3.25              | 2 | 2.5 |

Accessory Kit

- **Maxi-Jet®PH** pump and power head is ideal for creating internal water movement or powering undergravel filters.
- **Maxi-Jet®PH** pump and power head is sealed and may be used either externally or fully submerged. It runs silently and is designed to assure that even if it runs dry, or the rotor jams, the pump will not overheat and damage the unit.
- **Maxi-Jet®PH** offers an optional venturi aeration device to provide optimal aeration and gas exchange in the aquarium. A silencer feature keeps the venturi aeration device operating quietly. The adjustable air filter feature permits the user to fine-tune air volume and water mixing as desired.
- The **Maxi-Jet®PH** has a fully rotational output to direct water anywhere in the aquarium. The intake tube adapter with prefilter screen prevents gravel or loose material in the aquarium from getting into the pump.
- **Maxi-Jet®PH** pump and power head comes in a complete range of sizes that make it flexible enough to use in small and medium trickle filter systems. Maxi-Jet®PH combines excellent performance with low power consumption and is excellent for both freshwater and saltwater aquariums.
- An accessory kit includes an innovative triple-suction cup mount, an adjustable hook with cable guide, and a grid support for optional foam cartridge.
